

## **2004 Second Quarter Case Flow Analysis Update**

This report is provided as an update to the Case Flow Management Analysis published on February 19, 2004 by the Criminal Justice Planning Unit. The purpose of this report is to provide information to criminal justice leaders on the case flow statistics at the General Sessions and Criminal Court levels during the second quarter of 2004CY. YTD statistics are provided for a comparison of the first two quarters during 2003 and 2004. Graphs summarize statistics for each quarter since January 2002.

Notable variations in case flow statistics in Criminal Court from the first two quarters of 2003CY compared to the first two quarters in 2004CY:

1. The total number of criminal court cases disposed increased 16.3% while the average case age from criminal court filing to disposition increased 4.9%.
2. The total number of FTAs issued in a Criminal Court case increased 24.4% while the impact these FTAs had on the average case age decreased 25.6%.
3. The total number of direct presentments disposed increased by 2.4% while the average case age from arrest to disposition increased 18.9% during the same time period.
4. The total number of indictments disposed increased 23.7% while the average case age from arrest to disposition decreased by two [2] days. Indictments also exhibited a 17.4% decrease in the average case age from boundover to criminal court filing.
5. The total number of information agreements disposed increased 5.3% while the average case age from arrest to disposition increased 7.2%.
6. The total number of defendants who spent the majority of time in jail until their case was disposed increased by 10.2% while the average time they spent in jail decreased by one [1] day.

Notable variations in case flow statistics in General Sessions from the first two quarters of 2003CY compared to the first two quarters in 2004CY:

1. The total number of warrants disposed increased 15.9% while the average case age from arrest to disposition increased 9.1%.
2. The total number of jail warrants disposed increased 26.4% while the average time to dispose of the jail warrants increased by 2.3%. The average time these defendants spent in jail until the warrant was disposed increased 1.9%.
3. The number of FTAs served increased 21.9% while the impact these FTAs had on the average case age increased 22.9%.
4. The number of warrants disposed by trial decreased 12.0%. In addition, those warrants disposed by trial exhibited a 14.9% decrease in the time from arrest to disposition.

### Notes:

Due to the standard business practices of the GS Metro Probation Division, analysis is not available on probation violations at the General Sessions level.

Cases exist in which multiple Probation Violations (PV) were filed on the same defendant before the previous PV was disposed. In these cases, the most recent PV was used to calculate the number of days in column 5.

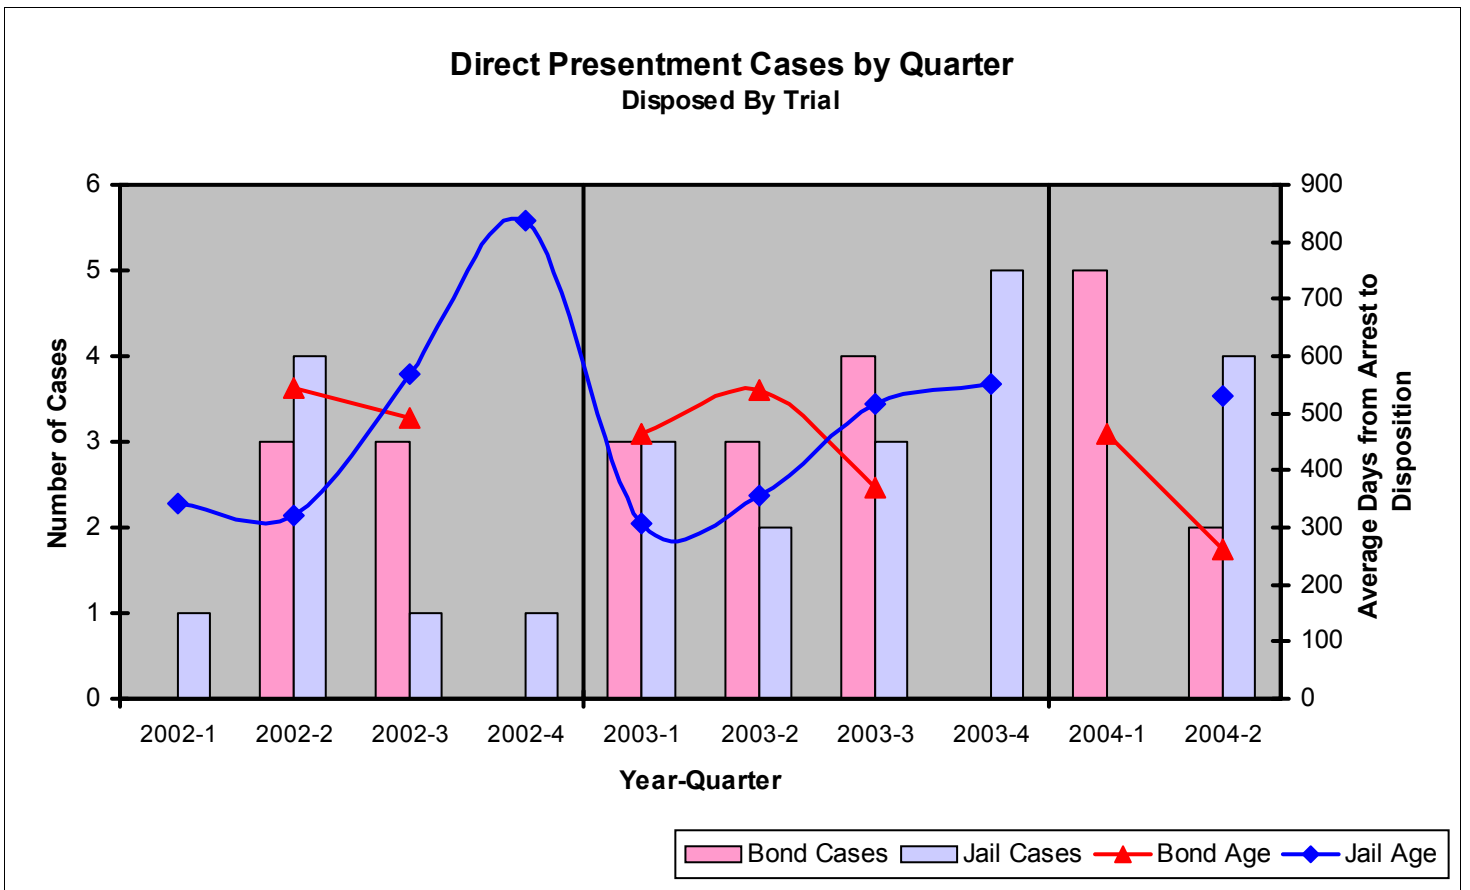

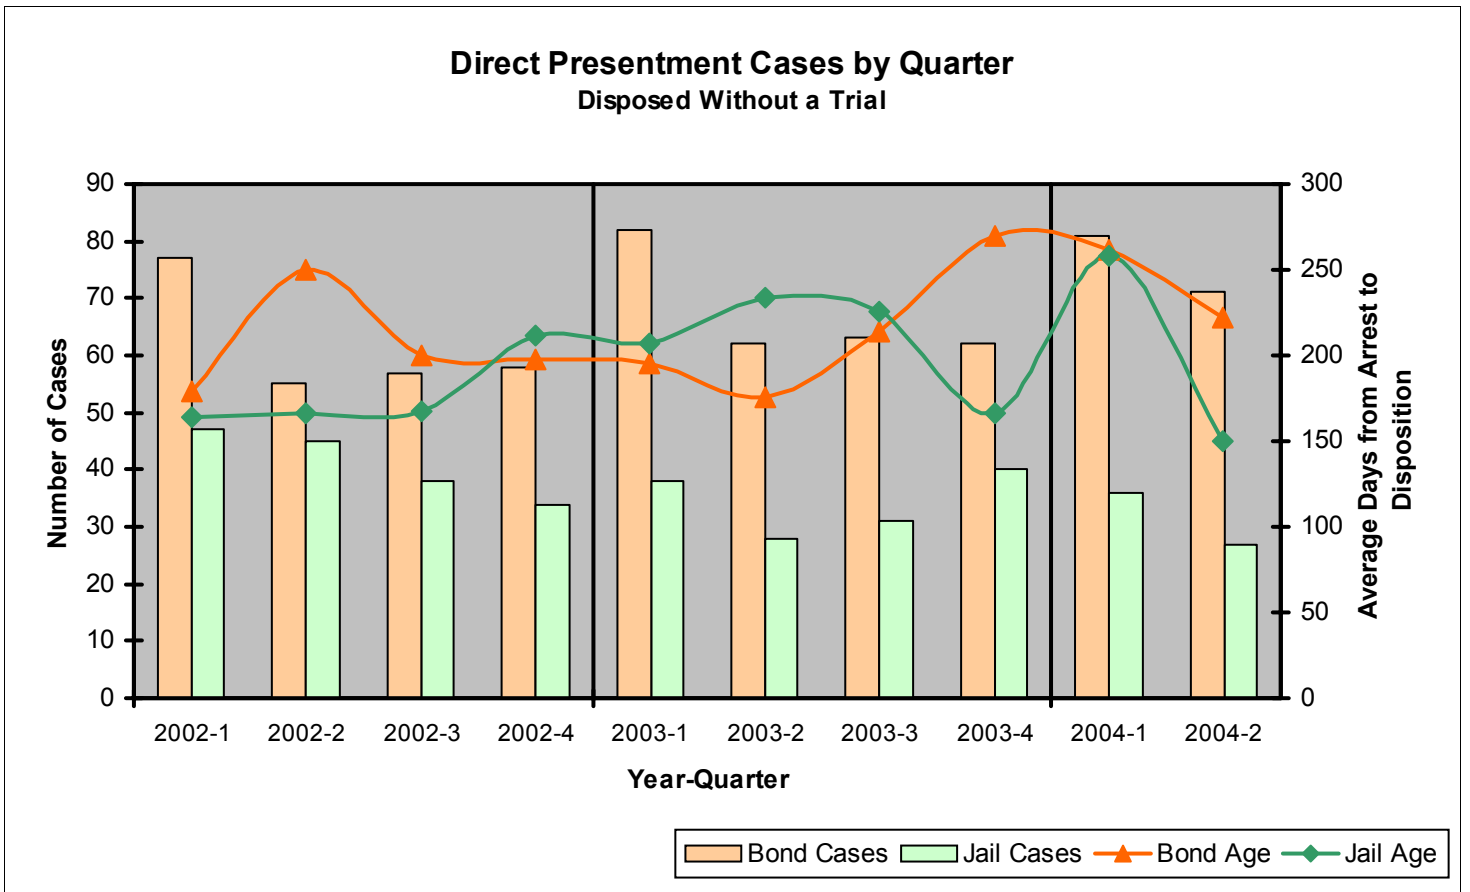

Further review of a sample of cases revealed that a small percentage (approximately 0.4% since 2002) of PV dispositions did not have an actual PV disposition event, but were disposed through an *Amended Sentence* event. Statistics for these cases have been included for purposes of this report.

The following events were used to identify PV Dispositions:

- Revoke Probation
- Amended Sentence
- Probation Revoked
- Probation Reinstated
- Dispose PV/CCV
- Dispose PV/CCV - Dismissed
- Dispose PV/CCV - Sustained
- Dispose PV/CCV - Retired

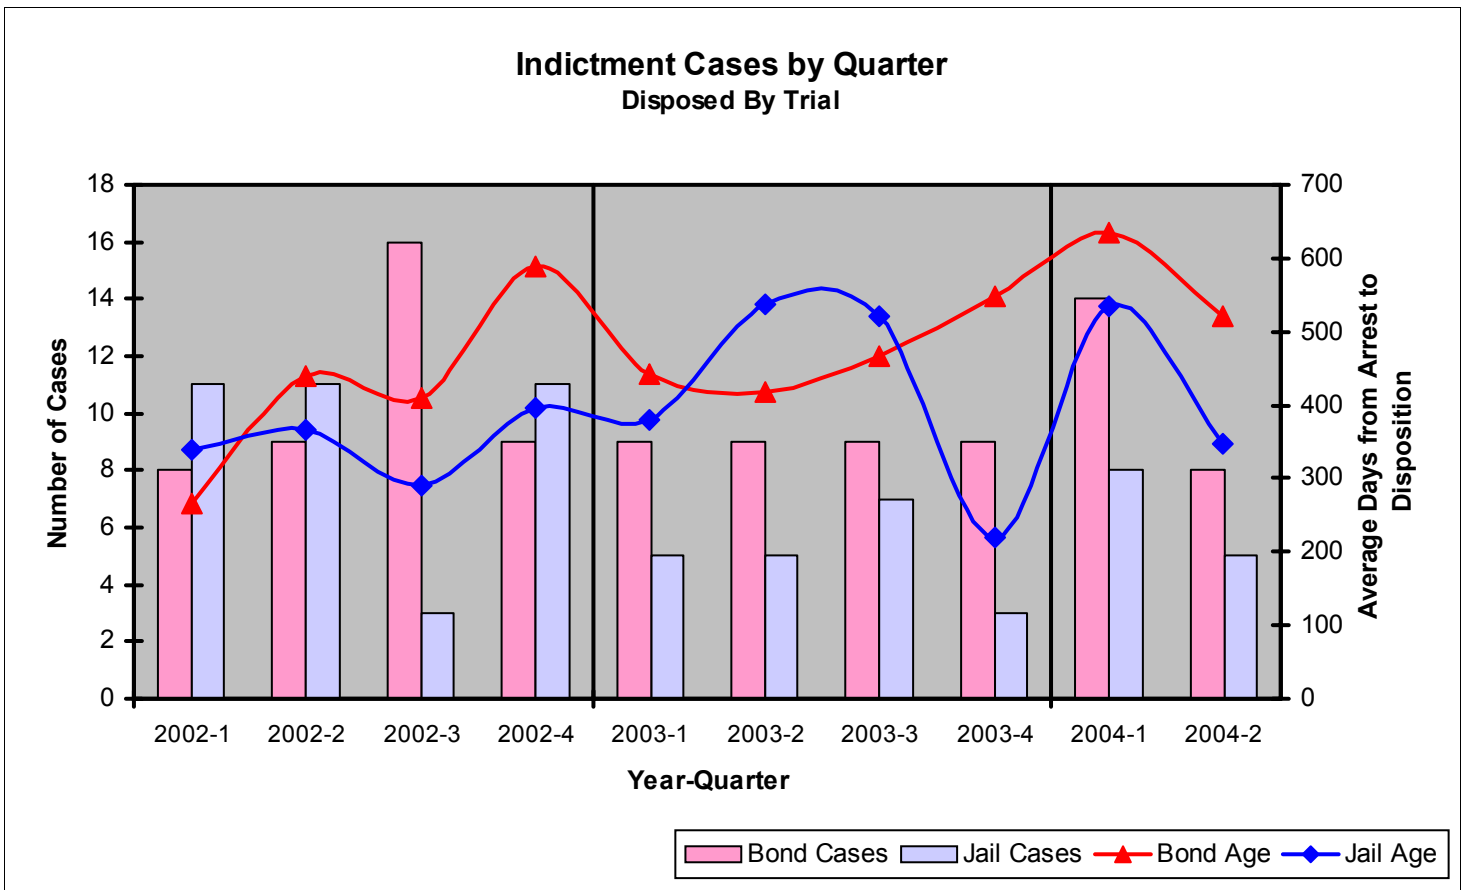

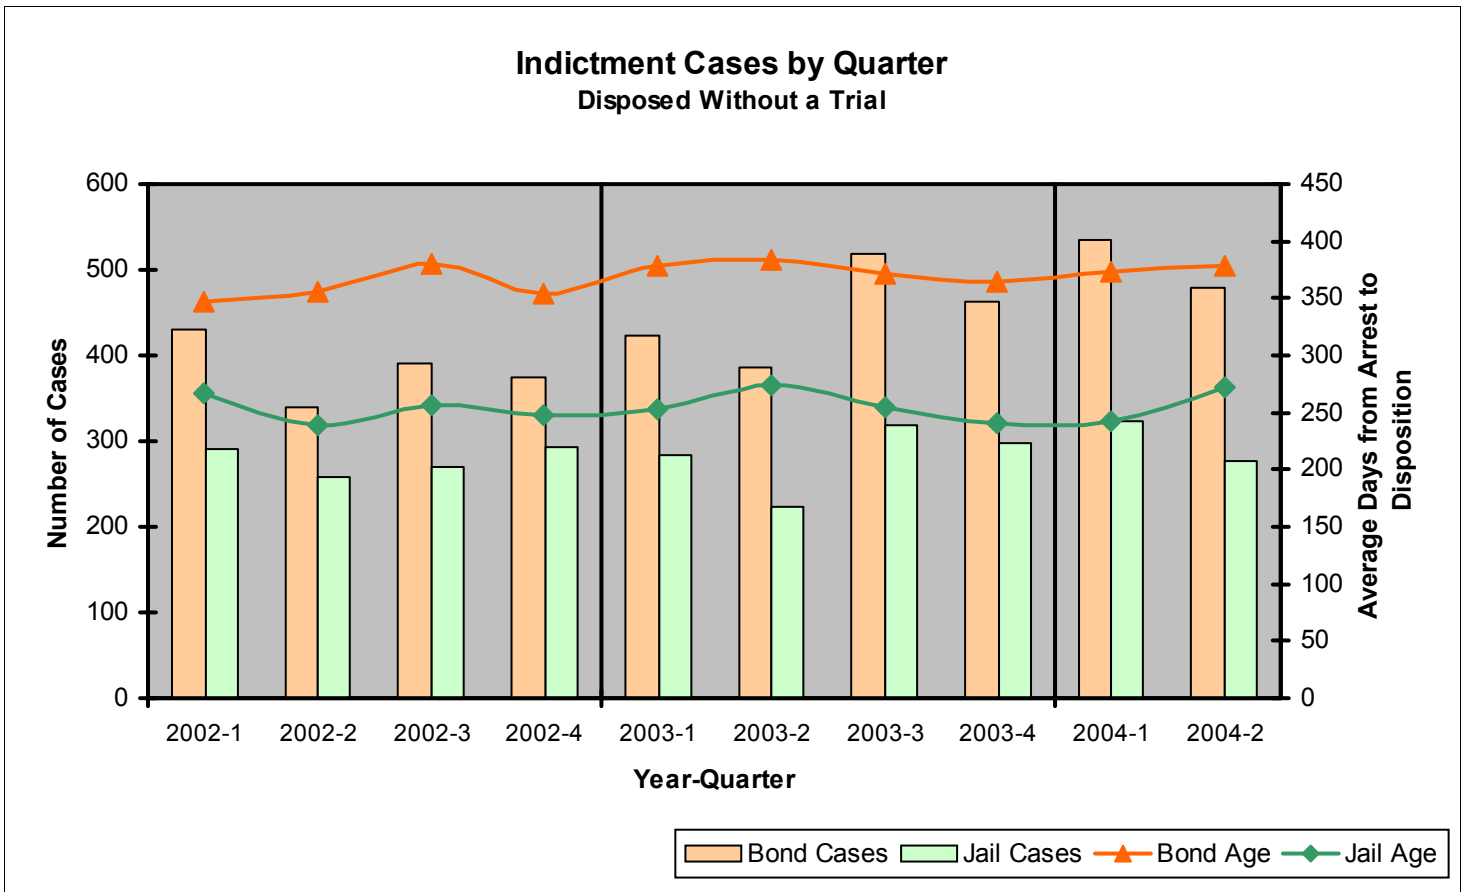

\*In those cases in which two PV disposition events were used to dispose of a single PV Filing, only one PV Disposition event was used. For example, many cases exist in which a PV Filing was disposed by both a Dispose PV/CCV - Sustained event and an Amended Sentence Event. This PV disposition was only counted once.
